	Urgent	**Not Urgent**
Important	**Do - (Your MVP)** ● Import PNG and JPG screenshots into a local collection. ● Add, edit, and remove descriptive tags. ● Browse screenshots in a gallery and open a selected image. ● Search and filter screenshots by tags. ● Save screenshots and their tags between sessions.	**Schedule - (For V2.0+)** ● Recognize text inside screenshots so their contents are searchable. ● Organize screenshots into named collections. ● Tag multiple screenshots at once. ● Detect duplicate screenshots during import.
Not Important	**Delegate - (Use a library)** ● Use a built-in file chooser to select screenshots. ● Use existing image utilities to load and resize gallery previews. ● Use a JSON library to read and write screenshot metadata.	**Delete - (Cut it)** ● Public screenshot sharing and social features. ● Cloud synchronization across devices. ● A built-in image editor with cropping, filters, and drawing tools. ● AI-generated image descriptions and automatic tags.
